- Durable Stainless Steel Construction
- Stainless Steel Pulp and Juice Bowls
- Convenient carrying handle
- Available in 120V/60Hz/1Ph and
220V/50-60Hz/1Ph

The Omega's Nutrition Systems is a "masticating-style" juice extractor and more! The adjustable end cap with 5 settings increases the juicers efficiency. Use setting 5 for harder produce like carrots and setting 1 for items that need a stronger squeeze (Wheatgrass).

A masticating juicer juices at low speeds of 80 RPM minimizing heat build-up and oxidation. The auger system forces produce into a tight chamber, grinding and pressing the food to squeeze out the juice from items as fine as wheatgrass and leafy vegetables. With a Nutrition System you can also make all-natural nut butters, baby food, soy milk, almond milk and a variety of healthy snacks.

Specifications subject to change without notice.

Approvals: cETLus, ETL Sanitation, CE
